DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: On page 3, line 5, "maim frame" should be --main frame--.

On page 8, lines 15-25, shadow mask uses the reference numbers 30 and 20, main frame uses the reference numbers 21 and 20.

On page 9, line 8, "Therefore, to making a inflection point around the peripheral portions..." is unclear, but should probably be --Therefore, to make an inflection point around the peripheral portions...--.

Appropriate correction is required.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Shadow mask (30). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2879

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Ragland, Jr. (US 5,644,192).

Regarding claim 1, Ragland discloses a supporting frame structure for a tension-type shadow mask of a color CRT with a pair of main frames having a supporting pair for supporting a shadow mask, a pair of sub frames combined with the main frames and the curvature structure of each one of the supporting parts in the main frames after the elastic force is removed satisfies the equation $\Delta R/R = 0.95 \sim 1.05$.

Regarding claim 2, Ragland discloses the curvature of each one of the supporting parts in the main frames is in the form of a polynomial.
